Mix & match

On each right page of the catalogue you can see pictures of plain pens with code - these are our standards. Colours combinations are based on existing parts of pens from the catalogue, minimum is 2000 pcs (and every 2000pcs). In case of different number, the minimum quantity is 3000 pcs with an extra charge of 15 Euro.

Projects & printing

For preparing visual proof it is required to provide us editable logo or text in .cdr, .eps or .pdf files. The graphic designer places your logo on the pen basing on technical possibilities of each model of pen. First two projects are free of charge, any other change is 15 Euro.

We aim to match Pantone Colours as close as possible but cannot guarantee a completely perfect match, especially when printing onto a substrate other than white in colour. In case we propose to print white colour base. In padprinting technique, if white colour should be snow-white (solid - chalky), we add 1 printing colour - lacquer

Digital Printing

In order to reach the colour closest to the colour required by the Customer, it is advised to specify colours acc.to Pantone color.

If this is not possible, the colours should be selected acc. to the "proof" sent by the Customer (print, product, flyer, etc).

Accepted tolerance of displacement in digital printing is +/-0,2-0,3 mm.

Accepted tolerance of displacement in transfer printing is +/- 2-3 mm.
